\$5,086,000 Buffered PLUS Based on the Performance of the EURO STOXX 50® Index due May 7, 2026

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

The Buffered PLUS are senior unsecured obligations of Royal Bank of Canada, do not pay interest, do not guarantee any return of principal at maturity, provide a minimum payment at maturity of only 15% of the stated principal amount and have the terms described in the accompanying prospectus supplement and prospectus, as supplemented or modified by this document. At maturity, if the level of the underlying index has **increased**, investors will receive the stated principal amount of their investment plus a return reflecting the leveraged upside performance of the underlying index, subject to the maximum payment at maturity. If the level of the underlying index **has decreased**, but not by more than the specified buffer amount, investors will receive the stated principal amount of their investment. However, if the level of the underlying index **has decreased** by more than the specified buffer amount, investors will lose 1% for every 1% decline beyond that amount, subject to the minimum payment of 15% of the stated principal amount. The Buffered PLUS are for investors who seek an equity index-based return and who are willing to risk their principal and forgo current income and upside above the maximum payment at maturity in exchange for the upside leverage and buffer feature, which in each case apply to a limited range of performance of the underlying index.

Investors may lose up to 85% of the principal amount of the Buffered PLUS. The Buffered PLUS are senior notes issued as part of Royal Bank of Canada's Global Medium-Term Notes, Series I program. All payments on the Buffered PLUS are subject to the credit risk of Royal Bank of Canada.

SUMMARY TERMS			
Issuer:	Royal Bank of Canada		
Underlying index:	The EURO STOXX 50® Index (Bloomberg symbol: "SX5E Index")		
Aggregate principal amount:	\$5,086,000		
Stated principal amount:	\$1,000 per Buffered PLUS		
Issue price:	\$1,000 per Buffered PLUS		
Pricing date:	October 31, 2023		
Issue date:	November 3, 2023		
Valuation date:	April 30, 2026, subject to adjustment for non-trading days and certain market disruption events		
Maturity date:	May 7, 2026, subject to adjustment as described in "Additional Terms of the Buffered PLUS" below.		
Payment at maturity:	<p>If the final index level is <i>greater than</i> the initial index level:</p> <p style="text-align: center;">$\\$1,000 + \\$1,000 \times \text{leverage factor} \times \text{underlying index return}$</p> <p><i>In no event will the payment at maturity exceed the maximum payment at maturity.</i></p> <p>If the final index level is <i>less than or equal to</i> the initial index level, but has decreased from the initial index level by no more than 15%:</p> <p style="text-align: center;">\$1,000</p> <p>If the final index level is <i>less than</i> the initial index level and has decreased from the initial index level by more than 15%:</p> <p style="text-align: center;">$\\$1,000 + [\\$1,000 \times (\text{underlying index return} + \text{buffer amount})]$</p> <p><i>This amount will be less than the stated principal amount of \$1,000, but will be at least \$150. You will lose some or a significant portion of the principal amount if the final index level is less than the initial index level by more than 15%.</i></p>		
Maximum payment at maturity:	\$1,445.00 per Buffered PLUS (144.50% of the stated principal amount)		
Leverage factor:	200%		
Buffer amount:	15%		
Underlying index return:	$(\text{final index level} - \text{initial index level}) / \text{initial index level}$		
Initial index level:	4,061.12, which was the closing level of the underlying index on the pricing date		
Final index level:	The closing level of the underlying index on the valuation date		
CUSIP / ISIN:	78016NV87 / US78016NV879		
Listing:	The Buffered PLUS will not be listed on any securities exchange.		
Agent:	RBC Capital Markets, LLC ("RBCCM").		
Commissions and issue price:	Price to public	Agent's commissions	Proceeds to issuer
Per Buffered PLUS	\$1,000.00	\$25.00 ⁽¹⁾ \$5.00 ⁽²⁾	\$970.00
Total	\$5,086,000	\$127,150 \$25,430	\$4,933,420

⁽¹⁾ RBCCM, acting as agent for Royal Bank of Canada, will receive a fee of \$30.00 per \$1,000 stated principal amount and will pay to Morgan Stanley Wealth Management ("MSWM") a fixed sales commission of \$25.00 for each Buffered PLUS that MSWM sells. See "Supplemental Information Regarding Plan of Distribution; Conflicts of Interest."

⁽²⁾ Of the amount per \$1,000 stated principal amount received by RBCCM, acting as agent for Royal Bank of Canada, RBCCM will pay MSWM a structuring fee of \$5.00 for each Buffered PLUS.

The initial estimated value of the Buffered PLUS as of the pricing date was \$956.40 per \$1,000 in stated principal amount, which is less than the price to the public. The market value of the Buffered PLUS at any time will reflect many factors, cannot be predicted with accuracy, and may be less than this amount.

An investment in the Buffered PLUS involves certain risks. See "Risk Factors" beginning on page 6 of this document, and "Risk Factors" beginning on page S-2 of the accompanying prospectus supplement, and beginning on page 1 of the prospectus.

You should read this document together with the related prospectus supplement and prospectus, each of which can be accessed via the hyperlinks below, before you decide to invest. Please also see "Additional Terms of the Buffered PLUS" in this document.

[Prospectus dated September 14, 2021](#)

None of the Securities and Exchange Commission, any state securities commission or any other regulatory body has approved or disapproved of the Buffered PLUS or passed upon the adequacy or accuracy of this document. Any representation to the contrary is a criminal offense. The Buffered PLUS will not constitute deposits insured by the Canada Deposit Insurance Corporation, the U.S. Federal Deposit Insurance Corporation or any other Canadian or U.S. government agency or instrumentality. The Buffered PLUS are not subject to conversion into our common shares under subsection 39.2(2.3) of the Canada Deposit Insurance Corporation Act.

Buffered PLUS Based on the Performance of the EURO STOXX 50® Index due May 7, 2026

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

Investment Summary

Buffered Performance Leveraged Upside Securities

Principal at Risk Securities

The Buffered PLUS Based on the Performance of the EURO STOXX 50® Index due May 7, 2026 (the “Buffered PLUS”) can be used:

- As an alternative to direct exposure to the underlying index that enhances returns for a certain range of positive performance of the underlying index, subject to the maximum payment at maturity.
- To potentially enhance returns and outperform the underlying index in a moderately bullish scenario.
- To achieve similar levels of upside exposure to the underlying index as a direct investment, subject to the maximum payment at maturity, while using fewer dollars by taking advantage of the leverage factor.
- To obtain a buffer against a specified level of negative performance in the underlying index.

The Buffered PLUS are exposed on a 1:1 basis to the negative performance of the underlying index beyond the buffer amount, subject to the minimum payment of 15% of the stated principal amount.

Maturity:	Approximately 2.5 years
Leverage factor:	200% (applicable only if the final index level is greater than the initial index level)
Buffer amount:	15%, with 1-to-1 downside exposure beyond the buffer
Maximum payment at maturity:	\$1,445.00 per Buffered PLUS (144.50% of the stated principal amount)
Minimum payment at maturity:	\$150.00 per Buffered PLUS (15% of the stated principal amount). Investors may lose up to 85% of the stated principal amount.
Coupon:	None

Buffered PLUS Based on the Performance of the EURO STOXX 50® Index due May 7, 2026

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

Key Investment Rationale

These Buffered PLUS offer leveraged upside exposure to the positive performance of the underlying index and a limited buffer against the negative performance of the underlying index, subject to the minimum payment at maturity. At maturity, if the level of the underlying index has **increased**, investors will receive the stated principal amount of their investment plus a return reflecting the leveraged upside performance of the underlying index, subject to the maximum payment at maturity. If the level of the underlying index has **decreased**, but not by more than the buffer amount, investors will receive the stated principal amount of their investment. However, if the level of the underlying index has **decreased** by more than the buffer amount, investors will lose 1% for every 1% decline beyond the specified buffer amount, subject to the minimum payment at maturity. **Investors may lose up to 85% of the stated principal amount of the Buffered PLUS.**

Leveraged Upside Performance

The Buffered PLUS offer investors an opportunity to capture enhanced returns relative to a direct investment in the underlying index within a certain range of positive performance.

Upside Scenario

The level of the underlying index increases and, at maturity, we will pay the stated principal amount of \$1,000 plus 200% of the underlying index return, subject to the maximum payment at maturity of \$1,445.00 per Buffered PLUS (144.50% of the stated principal amount).

Par Scenario

The level of the underlying index remains unchanged or declines from the initial index level by an amount *less than or equal to* the buffer amount of 15%, and the Buffered PLUS will pay the stated principal amount of \$1,000 at maturity.

Downside Scenario

The level of the underlying index declines by more than 15% and, at maturity, the Buffered PLUS will pay less than the stated principal amount by an amount that is proportionate to the percentage decrease in the level of the underlying index beyond the buffer amount of 15%. (For example, if the level of the underlying index declines by 25%, the Buffered PLUS will pay \$900.00, or 90.00% of the stated principal amount). The minimum payment at maturity is \$150.00 per Buffered PLUS.

Buffered PLUS Based on the Performance of the EURO STOXX 50® Index due May 7, 2026

Additional Information

You should read this document together with the prospectus dated September 14, 2021, as supplemented by the prospectus supplement dated September 14, 2021, relating to our Senior Global Medium-Term Notes, Series I, of which the Buffered PLUS are a part. This document, together with these documents, contains the terms of the Buffered PLUS and supersedes all other prior or contemporaneous oral statements as well as any other written materials, including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, brochures or other educational materials of ours.

You should rely only on the information provided or incorporated by reference in this document, the prospectus and the prospectus supplement. We have not authorized anyone else to provide you with different information, and we take no responsibility for any other information that others may give you. We and Morgan Stanley Wealth Management are offering to sell the Buffered PLUS and seeking offers to buy the Buffered PLUS only in jurisdictions where it is lawful to do so. The information contained in this document and the accompanying prospectus supplement and prospectus is current only as of their respective dates.

If the information in this document differs from the information contained in the prospectus supplement or the prospectus, you should rely on the information in this document.

You should carefully consider, among other things, the matters set forth in “Risk Factors” in this document and the accompanying prospectus supplement and prospectus, as the Buffered PLUS involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the Buffered PLUS.

You may access these documents on the SEC website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

How the Buffered PLUS Work

Payoff Diagram

The payoff diagram below illustrates the payment at maturity on the Buffered PLUS for a range of hypothetical percentage changes in the closing level of the underlying index. The graph is based on the following terms:

Stated principal amount:	\$1,000 per Buffered PLUS
Buffer amount:	15%
Leverage factor:	200%
Maximum payment at maturity:	\$1,445.00 per Buffered PLUS (144.50% of the stated principal amount)
Minimum payment at maturity:	\$150.00 per Buffered PLUS (15.00% of the stated principal amount)

Buffered PLUS Payoff Diagram

How it works

- Upside Scenario.** If the final index level is greater than the initial index level, then investors would receive the \$1,000 stated principal amount plus a return reflecting 200% of the appreciation of the underlying index over the term of the Buffered PLUS, subject to the maximum payment at maturity. Under the terms of the Buffered PLUS, an investor would realize the maximum payment at maturity of \$1,445.00 per Buffered PLUS (144.50% of the stated principal amount) at a final index level of 122.25% of the initial index level.
 - If the underlying index appreciates 21%, the investor would receive a 42% return, or \$1,420.00 per Buffered PLUS, or 142% of the stated principal amount.
 - If the underlying index appreciates 50%, the investor would receive only the maximum payment at maturity of \$1,445.00 per Buffered PLUS, or 144.50% of the stated principal amount.
- Par Scenario.** If the final index level is less than or equal to the initial index level but has decreased from the initial index level by an amount less than or equal to the buffer amount of 15%, the investor would receive the \$1,000 stated principal amount.
 - If the underlying index depreciates 12%, the investor would receive \$1,000.00 per Buffered PLUS, a 0% return.
- Downside Scenario.** If the final index level is less than the initial index level by an amount greater than the buffer amount of 15%, the investor would receive an amount that is less than the \$1,000 stated principal amount, based on a 1% loss of principal for each 1% decline in the underlying index of more than 15%. The minimum payment at maturity is \$150.00 per Buffered PLUS.
 - If the underlying index depreciates 30%, the investor would lose 15% of the investor's principal and receive only \$850.00 per Buffered PLUS at maturity, or 85% of the stated principal amount.

Buffered PLUS Based on the Performance of the EURO STOXX 50® Index due May 7, 2026

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

Risk Factors

An investment in the Buffered PLUS is subject to the risks described below, as well as the risks described under “Risk Factors” in the accompanying prospectus supplement and prospectus. Investors in the Buffered PLUS are also exposed to further risks related to the issuer of the Buffered PLUS, Royal Bank of Canada, which are described in Royal Bank of Canada’s annual report on Form 40-F for its most recently completed fiscal year, filed with the SEC and incorporated by reference herein. See the categories of risks, identified and disclosed in the management’s discussion and analysis of financial condition and results of operations included in the annual report on Form 40-F. This section (and the management’s discussion and analysis section of the annual report on Form 40-F) describes the most significant risks relating to the Buffered PLUS. You should carefully consider whether the Buffered PLUS are appropriate for you in light of your particular circumstances.

Risks Relating to the Terms and Structure of the Buffered PLUS

- **The Buffered PLUS do not pay interest and provide a minimum payment at maturity of only 15% of your principal.** The terms of the Buffered PLUS differ from those of ordinary debt securities in that the Buffered PLUS do not pay interest and provide a minimum payment at maturity of only 15% of your principal. If the final index level has declined from the initial index level by an amount greater than the buffer amount of 15%, the payout at maturity will be an amount in cash that is less than the \$1,000 stated principal amount of each Buffered PLUS by an amount proportionate to the decrease in the level of the underlying index, beyond the buffer amount of 15%, and may be as low as \$150.00 per Buffered PLUS.
- **The appreciation potential of the Buffered PLUS is limited by the maximum payment at maturity.** The appreciation potential of the Buffered PLUS is limited by the maximum payment at maturity of \$1,445.00 per Buffered PLUS, or 144.50% of the stated principal amount. Although the leverage factor provides 200% exposure to any increase in the level of the underlying index as of the valuation date above the initial index level, because the payment at maturity will be limited to 144.50% of the stated principal amount, any increase in the final index level over the initial index level by more than 22.25% of the initial index level will not further increase the return on the Buffered PLUS.
- **The Buffered PLUS are subject to the credit risk of Royal Bank of Canada, and any actual or anticipated changes to its credit ratings or credit spreads may adversely affect the market value of the Buffered PLUS.** You are dependent on Royal Bank of Canada’s ability to pay all amounts due on the Buffered PLUS at maturity and therefore you are subject to the credit risk of Royal Bank of Canada. If Royal Bank of Canada defaults on its obligations under the Buffered PLUS, your investment would be at risk and you could lose some or all of your investment. As a result, the market value of the Buffered PLUS prior to maturity will be affected by changes in the market’s view of Royal Bank of Canada’s creditworthiness. Any actual or anticipated decline in Royal Bank of Canada’s credit ratings or increase in the credit spreads charged by the market for taking Royal Bank of Canada credit risk is likely to adversely affect the market value of the Buffered PLUS.
- **The amount payable on the Buffered PLUS is not linked to the level of the underlying index at any time other than the valuation date.** The final index level will be based on the closing level of the underlying index on the valuation date, subject to adjustment for non-trading days and certain market disruption events. For example, even if the level of the underlying index appreciates prior to the valuation date but then decreases on the valuation date to a level that is less than the initial index level, the payment at maturity will be less, and may be significantly less than it would have been had the payment at maturity been linked to the level of the underlying index prior to that decrease. Although the actual level of the underlying index on the maturity date or at other times during the term of the Buffered PLUS may be higher than the final index level, the payment at maturity will be based solely on the closing level of the underlying index on the valuation date.
- **Investing in the Buffered PLUS is not equivalent to investing in the underlying index.** Investing in the Buffered PLUS is not equivalent to investing in the underlying index or its component stocks. Investors in the Buffered PLUS will not have voting rights or rights to receive dividends or other distributions or any other rights with respect to stocks that constitute the underlying index.
- **Governmental regulatory actions, such as sanctions, could adversely affect your investment in the Buffered PLUS.** Governmental regulatory actions, including, without limitation, sanctions-related actions by the U.S. or a foreign government, could prohibit or otherwise restrict persons from holding the Buffered PLUS or securities included in the underlying index, or engaging in transactions in them, and any such action could adversely affect the level of the underlying index. These regulatory actions could result in restrictions on the Buffered PLUS and could result in the loss of a significant portion of your initial investment in the Buffered PLUS, including if you are forced to divest the Buffered PLUS due to the government mandates, especially if such divestment must be made at a time when the value of the Buffered PLUS has declined.

Buffered PLUS Based on the Performance of the EURO STOXX 50® Index due May 7, 2026

Buffered Performance Leveraged Upside SecuritiesSM
Principal at Risk Securities

- **Significant aspects of the tax treatment of the Buffered PLUS are uncertain.** The tax treatment of an investment in the Buffered PLUS is uncertain. We do not plan to request a ruling from the Internal Revenue Service (the “IRS”) or from the Canada Revenue Agency regarding the tax treatment of an investment in the Buffered PLUS, and the IRS, the Canada Revenue Agency or a court may not agree with the tax treatment described in this document.

The IRS has issued a notice indicating that it and the U.S. Treasury Department are actively considering whether, among other issues, a holder should be required to accrue interest over the term of an instrument such as the Buffered PLUS even though that holder will not receive any payments with respect to the Buffered PLUS until maturity and whether all or part of the gain a holder may recognize upon sale, exchange or maturity of an instrument such as the Buffered PLUS should be treated as ordinary income. The outcome of this process is uncertain and could apply on a retroactive basis.

Please read carefully the sections entitled “Canadian Federal Income Tax Consequences” and “Supplemental Discussion of U.S. Federal Income Tax Consequences” in this document, the section entitled “Tax Consequences” in the accompanying prospectus and the section entitled “Certain Income Tax Consequences” in the accompanying prospectus supplement. You should consult your tax advisor about your own tax situation.

Risks Relating to the Initial Estimated Value of the Buffered PLUS

- **The initial estimated value of the Buffered PLUS is less than the price to the public.** The initial estimated value that is set forth on the cover page of this pricing supplement does not represent a minimum price at which we, RBCCM or any of our affiliates would be willing to purchase the Buffered PLUS in any secondary market (if any exists) at any time. If you attempt to sell the Buffered PLUS prior to maturity, their market value may be lower than the price you paid for them and the initial estimated value. This is due to, among other things, changes in the level of the underlying index, the borrowing rate we pay to issue securities of this kind, and the inclusion in the price to the public of the agent’s commissions and the estimated costs relating to our hedging of the Buffered PLUS. These factors, together with various credit, market and economic factors over the term of the Buffered PLUS, are expected to reduce the price at which you may be able to sell the Buffered PLUS in any secondary market and will affect the value of the Buffered PLUS in complex and unpredictable ways. Assuming no change in market conditions or any other relevant factors, the price, if any, at which you may be able to sell your Buffered PLUS prior to maturity may be less than your original purchase price, as any such sale price would not be expected to include the agent’s commissions and the hedging costs relating to the Buffered PLUS. In addition to bid-ask spreads, the value of the Buffered PLUS determined for any secondary market price is expected to be based on the secondary rate rather than the internal funding rate used to price the Buffered PLUS and determine the initial estimated value. As a result, the secondary price will be less than if the internal funding rate was used. The Buffered PLUS are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your Buffered PLUS to maturity.
- **Our initial estimated value of the Buffered PLUS is an estimate only, calculated as of the pricing date.** The initial estimated value of the Buffered PLUS is based on the value of our obligation to make the payments on the Buffered PLUS, together with the mid-market value of the derivative embedded in the terms of the Buffered PLUS. See “Structuring the Buffered PLUS” below. Our estimate is based on a variety of assumptions, including our credit spreads, expectations as to dividends, interest rates and volatility, and the expected term of the Buffered PLUS. These assumptions are based on certain forecasts about future events, which may prove to be incorrect. Other entities may value the Buffered PLUS or similar securities at a price that is significantly different than we do. The value of the Buffered PLUS at any time after the pricing date will vary based on many factors, including changes in market conditions, and cannot be predicted with accuracy. As a result, the actual value you would receive if you sold the Buffered PLUS in any secondary market, if any, should be expected to differ materially from the initial estimated value of your Buffered PLUS.

Risks Relating to the Secondary Market for the Buffered PLUS

- **The market price of the Buffered PLUS will be influenced by many unpredictable factors.** Many factors will influence the value of the Buffered PLUS in the secondary market and the price at which RBCCM may be willing to purchase or sell the Buffered PLUS in the secondary market, including:
 - the trading price and volatility (frequency and magnitude of changes in value) of the securities represented by the underlying index;
 - dividend yields on the securities represented by the underlying index;
 - market interest rates;
 - our creditworthiness, as represented by our credit ratings or as otherwise perceived in the market;
 - time remaining to maturity;

Buffered PLUS Based on the Performance of the EURO STOXX 50® Index due May 7, 2026

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

- geopolitical conditions and economic, financial, political, regulatory or judicial events that affect the underlying index; and
- the exchange rate between the U.S. dollar and the euro.

The level of the underlying index may be volatile, and you should not take the historical levels of the underlying index as an indication of future performance. See “Information About the Underlying Index” below. You may receive less, and possibly significantly less, than the stated principal amount per Buffered PLUS if you sell your Buffered PLUS prior to maturity.

- **The Buffered PLUS will not be listed on any securities exchange and secondary trading may be limited.** The Buffered PLUS will not be listed on any securities exchange. Therefore, there may be little or no secondary market for the Buffered PLUS. RBCCM may, but is not obligated to, make a market in the Buffered PLUS, and, if it chooses to do so at any time, it may cease doing so. When it does make a market, it will generally do so for transactions of routine secondary market size at prices based on its estimate of the current value of the Buffered PLUS, taking into account its bid/offer spread, our credit spreads, market volatility, the notional size of the proposed sale, the cost of unwinding any related hedging positions, the time remaining to maturity and the likelihood that it will be able to resell the Buffered PLUS. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the Buffered PLUS easily. Because we do not expect that other broker-dealers will participate significantly in the secondary market for the Buffered PLUS, the price at which you may be able to trade your Buffered PLUS is likely to depend on the price, if any, at which RBCCM is willing to transact. If, at any time, RBCCM were not to make a market in the Buffered PLUS, it is likely that there would be no secondary market for the Buffered PLUS. Accordingly, you should be willing to hold your Buffered PLUS to maturity.

Risks Relating to the Underlying Index

- **An investment in the Buffered PLUS is subject to risks relating to non-U.S. securities markets.** Because foreign companies or foreign equity securities included in the underlying index are publicly traded in the applicable foreign countries and are denominated in euros, an investment in the Buffered PLUS involves particular risks. For example, the non-U.S. securities markets may be more volatile than the U.S. securities markets, and market developments may affect these markets differently from the U.S. or other securities markets. Direct or indirect government intervention to stabilize the securities markets outside the U.S., as well as cross-shareholdings in certain companies, may affect trading prices and trading volumes in those markets. Also, the public availability of information concerning the foreign issuers may vary depending on their home jurisdiction and the reporting requirements imposed by their respective regulators. In addition, the foreign issuers may be subject to accounting, auditing and financial reporting standards and requirements that differ from those applicable to U.S. reporting companies.
- **The Buffered PLUS will not be adjusted for changes in exchange rates.** Although the equity securities composing the underlying index are traded in euro, and the Buffered PLUS are denominated in U.S. dollars, the amount payable on the Buffered PLUS at maturity will not be adjusted for changes in the exchange rates between the U.S. dollar and the euro. Changes in exchange rates, however, may also reflect changes in the applicable non-U.S. economies that in turn may affect the level of the underlying index, and therefore the Buffered PLUS. The amount we pay in respect of your Buffered PLUS on the maturity date will be determined solely in accordance with the procedures described in this document.
- **Adjustments to the underlying index could adversely affect the value of the Buffered PLUS.** The sponsor of the underlying index (the “index sponsor”) may add, delete or substitute the stocks constituting the underlying index, or make other methodological changes. Further, the index sponsor may discontinue or suspend calculation or publication of the underlying index at any time. Any of these actions could affect the value of and the return on the Buffered PLUS.
- **We have no affiliation with the index sponsor and will not be responsible for any actions taken by the index sponsor.** The index sponsor is not an affiliate of ours and will not be involved in the offering of the Buffered PLUS in any way. Consequently, we have no control over the actions of the index sponsor, including any actions of the type that would require the calculation agent to adjust the payment to you at maturity. The index sponsor has no obligation of any sort with respect to the Buffered PLUS. Thus, the index sponsor has no obligation to take your interests into consideration for any reason, including in taking any actions that might affect the value of the Buffered PLUS. None of our proceeds from the issuance of the Buffered PLUS will be delivered to the index sponsor.
- **Historical levels of the underlying index should not be taken as an indication of its future levels during the term of the Buffered PLUS.** The trading prices of the equity securities comprising the underlying index will determine the level of the underlying index at any given time. As a result, it is impossible to predict whether the level of the underlying index will rise or fall. Trading prices of the equity securities comprising the underlying index will be influenced by complex and interrelated political, economic, financial and other factors.

Buffered PLUS Based on the Performance of the EURO STOXX 50® Index due May 7, 2026

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

Risks Relating to Conflicts of Interest

- **Hedging and trading activity by us and our subsidiaries could potentially adversely affect the value of the Buffered PLUS.** One or more of our subsidiaries and/or third party dealers expect to carry out hedging activities related to the Buffered PLUS (and possibly to other instruments linked to the underlying index or the securities it represents), including trading in those securities as well as in other related instruments. Some of our subsidiaries also may conduct trading activities relating to the underlying index on a regular basis as part of their general broker-dealer and other businesses. Any of these hedging or trading activities on or prior to the pricing date could have affected the initial index level and, therefore, could have increased the level at or above which the underlying index must close on the valuation date so that investors do not suffer a loss on their initial investment in the Buffered PLUS. Additionally, such hedging or trading activities during the term of the Buffered PLUS, including on the valuation date, could adversely affect the closing level of the underlying index on the valuation date and, accordingly, the amount of cash an investor will receive at maturity.
- **Our business activities may create conflicts of interest.** We and our affiliates may engage in trading activities related to the underlying index or the securities represented by the underlying index that are not for the account of holders of the Buffered PLUS or on their behalf. These trading activities may present a conflict between the holders' interest in the Buffered PLUS and the interests we and our affiliates will have in proprietary accounts, in facilitating transactions, including options and other derivatives transactions, for our customers and in accounts under our management. These trading activities could be adverse to the interests of the holders of the Buffered PLUS.

We and our affiliates may presently or from time to time engage in business with one or more of the issuers of the securities represented by the underlying index. This business may include extending loans to, or making equity investments in, such companies or providing advisory services to such companies, including merger and acquisition advisory services. In the course of business, we and our affiliates may acquire non-public information relating to these companies, which we have no obligation to disclose to you, and, in addition, one or more of our affiliates may publish research reports about these companies. Neither we nor the agent have made any independent investigation regarding any matters whatsoever relating to the issuers of the securities represented by the underlying index.

Moreover, we and our affiliates may have published, and in the future expect to publish, research reports with respect to the underlying index or the securities which it represents. This research is modified from time to time without notice and may express opinions or provide recommendations that are inconsistent with purchasing or holding the Buffered PLUS. Any of these activities by us or one or more of our affiliates may affect the level of the underlying index and, therefore, the market value of the Buffered PLUS.

- **The calculation agent, which is a subsidiary of the issuer, will make determinations with respect to the Buffered PLUS, which may create a conflict of interest.** Our wholly owned subsidiary, RBCCM, will serve as the calculation agent. As calculation agent, RBCCM determined the initial index level, and will determine the final index level, the underlying index return and the amount of cash you will receive at maturity. Moreover, certain determinations made by RBCCM, in its capacity as calculation agent, may require it to exercise discretion and make subjective judgments, such as with respect to the occurrence or non-occurrence of market disruption events and the selection of a successor index or the calculation of the final index level in the event of a market disruption event or discontinuance of the underlying index. These potentially subjective determinations may adversely affect the payout to you at maturity. For further information regarding these types of determinations see "Additional Terms of the Buffered PLUS" below.

Buffered PLUS Based on the Performance of the EURO STOXX 50® Index due May 7, 2026

Principal at Risk Securities

Additional Terms of the Buffered PLUS

Please read this information in conjunction with the summary terms on the front cover of this document.

Additional Provisions

Postponement of the valuation date:

If the valuation date occurs on a day that is not a trading day or on a day on which the calculation agent has determined that a market disruption event (as defined below) has occurred or is continuing, then the valuation date will be postponed until the next succeeding trading day on which the calculation agent determines that a market disruption event does not occur or is not continuing; provided that in no event will the valuation date be postponed by more than five trading days. If the valuation date is postponed by five trading days, and a market disruption event occurs or is continuing on that fifth trading day, then the calculation agent may determine, in its good faith and reasonable judgment, what the closing level of the underlying index would have been in the absence of the market disruption event. If the valuation date is postponed, then the maturity date will be postponed by an equal number of business days. No interest shall accrue or be payable as a result of such postponement.

Market disruption events:

With respect to the underlying index and any relevant successor index, a “market disruption event” means:

- a suspension, absence or material limitation of trading of equity securities then constituting 20% or more of the level of the underlying index (or the relevant successor index) on the relevant exchanges (as defined below) for such securities for more than two hours of trading during, or during the one hour period preceding the close of, the principal trading session on such relevant exchange; or
- a breakdown or failure in the price and trade reporting systems of any relevant exchange as a result of which the reported trading prices for equity securities then constituting 20% or more of the level of the underlying index (or the relevant successor index) during the one hour preceding the close of the principal trading session on such relevant exchange are materially inaccurate; or
- a suspension, absence or material limitation of trading on the primary exchange or market for trading in futures or options contracts related to the underlying index (or the relevant successor index) for more than two hours of trading during, or during the one hour period preceding the close of, the principal trading session on such exchange or market; or
- a decision to permanently discontinue trading in the relevant futures or options contracts;

in each case as determined by the calculation agent in its sole discretion; and

- a determination by the calculation agent in its sole discretion that the event described above materially interfered with our ability or the ability of any of our affiliates to adjust or unwind all or a material portion of any hedge with respect to the Buffered PLUS.

For purposes of determining whether a market disruption event with respect to the underlying index (or the relevant successor index) exists at any time, if trading in a security included in the underlying index (or the relevant successor index) is materially suspended or materially limited at that time, then the relevant percentage contribution of that security to the level of the underlying index (or the relevant successor index) will be based on a comparison of (a) the portion of the level of the underlying index (or the relevant successor index) attributable to that security relative to (b) the overall level of the underlying index (or the relevant successor index), in each case immediately before that suspension or limitation.

For purposes of determining whether a market disruption event with respect to the underlying index (or the relevant successor index) has occurred:

- a limitation on the hours or number of days of trading will not constitute a market disruption event if it results from an announced change in the regular business hours of the relevant exchange, or the primary exchange or market for trading in futures or options contracts related to the underlying index (or the relevant successor index);
- limitations pursuant to the rules of any relevant exchange similar to NYSE Rule 80B (or any applicable rule or regulation enacted or promulgated by any other self-regulatory organization or any government agency of scope similar to NYSE Rule 80B as determined by the calculation agent) on trading during significant market fluctuations will constitute a suspension, absence or material limitation of trading;
- a suspension of trading in futures or options contracts on the underlying index (or the relevant successor index) by the primary exchange or market trading in such contracts by reason of:

Buffered PLUS Based on the Performance of the EURO STOXX 50® Index due May 7, 2026

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

- a price change exceeding limits set by such exchange or market,
- an imbalance of orders relating to such contracts, or
- a disparity in bid and ask quotes relating to such contracts,

will, in each such case, constitute a suspension, absence or material limitation of trading in futures or options contracts related to the underlying index (or the relevant successor index); and

- a “suspension, absence or material limitation of trading” on any relevant exchange or on the primary exchange or market on which futures or options contracts related to the underlying index (or the relevant successor index) are traded will not include any time when such exchange or market is itself closed for trading under ordinary circumstances.

“Relevant exchange” means, with respect to the underlying index or any successor index, the primary exchange or market of trading for any security (or any combination thereof) then included in the underlying index or such successor index, as applicable.

Discontinuation of/adjustments to the underlying index:

If the index sponsor discontinues publication of the underlying index and the index sponsor or another entity publishes a successor or substitute index that the calculation agent determines, in its sole discretion, to be comparable to the discontinued index (such index being referred to herein as a “successor index”), then the closing level of the underlying index on the valuation date will be determined by reference to the level of such successor index at the close of trading on the relevant exchange for the successor index on such day.

Upon any selection by the calculation agent of a successor index, the calculation agent will cause written notice to be promptly furnished to the Trustee, to us and to the holders of the Buffered PLUS.

If the index sponsor discontinues publication of the underlying index prior to, and that discontinuation is continuing on the valuation date, and the calculation agent determines, in its sole discretion, that no successor index is available at that time or the calculation agent has previously selected a successor index and publication of that successor index is discontinued prior to, and that discontinuation is continuing on, the valuation date, then the calculation agent will determine the closing level of the underlying index for that date. The closing level of the underlying index will be computed by the calculation agent in accordance with the formula for and method of calculating the underlying index or successor index, as applicable, last in effect prior to the discontinuation, using the closing price (or, if trading in the relevant securities has been materially suspended or materially limited, the calculation agent's good faith estimate of the closing price that would have prevailed but for the suspension or limitation) at the close of the principal trading session on that date of each security most recently included in the underlying index or successor index, as applicable.

If at any time the method of calculating the underlying index or a successor index, or the level thereof, is changed in a material respect, or if the underlying index or a successor index is in any other way modified so that the underlying index or successor index does not, in the opinion of the calculation agent, fairly represent the level of the underlying index or successor index had those changes or modifications not been made, then the calculation agent will, at the close of business in New York City on the date on which the closing level of the underlying index is to be determined, make any calculations and adjustments as, in the good faith judgment of the calculation agent, may be necessary in order to arrive at a level of a stock index comparable to the underlying index or successor index, as the case may be, as if those changes or modifications had not been made, and calculate the closing level of the underlying index with reference to the underlying index or such successor index, as adjusted. Accordingly, if the method of calculating the underlying index or a successor index is modified so that the level of the underlying index or such successor index is a fraction of what it would have been if there had been no such modification (e.g., due to a split in the underlying index), then the calculation agent will adjust its calculation of the underlying index or such successor index in order to arrive at a level of the underlying index or such successor index as if there had been no such modification (e.g., as if such split had not occurred).

Notwithstanding these alternative arrangements, discontinuation the publication of or modification of the underlying index or successor index, as applicable, may adversely affect the value of the Buffered PLUS.

Business day:

A business day means a Monday, Tuesday, Wednesday, Thursday or Friday that is not a day on which banking institutions in The City of New York generally are authorized or obligated by law, regulation or executive order to close.

Buffered PLUS Based on the Performance of the EURO STOXX 50® Index due May 7, 2026

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

Trading day:	A trading day means a day, as determined by the calculation agent, on which trading is generally conducted on (i) the relevant exchanges for securities comprising the underlying index or the successor index and (ii) the exchanges on which futures or options contracts related to the underlying index or the successor index are traded, other than a day on which trading on such relevant exchange or exchange on which such futures or options contracts are traded is scheduled to close prior to its regular weekday closing time.
Events of default and acceleration:	If the maturity of the Buffered PLUS is accelerated upon an event of default under the Indenture, the amount payable upon acceleration will be determined by the calculation agent. Such amount will be calculated as if the date of declaration of acceleration were the valuation date.
Minimum ticketing size:	\$1,000 / 1 Buffered PLUS
Additional amounts:	<p>We will pay any amounts to be paid by us on the Buffered PLUS without deduction or withholding for, or on account of, any and all present or future income, stamp and other taxes, levies, imposts, duties, charges, fees, deductions or withholdings ("taxes") now or hereafter imposed, levied, collected, withheld or assessed by or on behalf of Canada or any Canadian political subdivision or authority that has the power to tax, unless the deduction or withholding is required by law or by the interpretation or administration thereof by the relevant governmental authority. At any time a Canadian taxing jurisdiction requires us to deduct or withhold for or on account of taxes from any payment made under or in respect of the Buffered PLUS, we will pay such additional amounts ("Additional Amounts") as may be necessary so that the net amounts received by each holder (including Additional Amounts), after such deduction or withholding, shall not be less than the amount the holder would have received had no such deduction or withholding been required.</p> <p>However, no Additional Amounts will be payable with respect to a payment made to a holder of a Buffered PLUS or of a right to receive payments in respect thereto (a "Payment Recipient"), which we refer to as an "Excluded Holder," in respect of a beneficial owner or Payment Recipient:</p> <ul style="list-style-type: none"> (i) with whom we do not deal at arm's length (within the meaning of the Income Tax Act (Canada)) at the time of making such payment; (ii) who is subject to such taxes by reason of its holder being connected presently or formerly with Canada or any province or territory thereof otherwise than by reason of the holder's activity in connection with purchasing the Buffered PLUS, the holding of the Buffered PLUS or the receipt of payments thereunder; (iii) who is, or who does not deal at arm's length with a person who is, a "specified shareholder" (within the meaning of subsection 18(5) of the Income Tax Act (Canada)) of Royal Bank of Canada (generally a person will be a "specified shareholder" for this purpose if that person, either alone or together with persons with whom the person does not deal at arm's length, owns 25% or more of (a) our voting shares, or (b) the fair market value of all of our issued and outstanding shares); or who is a "specified entity" as defined in proposals to amend the Income Tax Act (Canada) released on April 29, 2022 with respect to "hybrid mismatch arrangements" with respect to Royal Bank of Canada or substantially analogous provisions of any finally enacted amendment to the Income Tax Act (Canada); (iv) who presents such security for payment (where presentation is required, such as if a security is issued in definitive form) more than 30 days after the relevant date; for this purpose, the "relevant date" in relation to any payments on any security means: <ul style="list-style-type: none"> a. the due date for payment thereof (whether at maturity or upon an earlier acceleration), or b. if the full amount of the monies payable on such date has not been received by the Trustee on or prior to such due date, the date on which the full amount of such monies has been received and notice to that effect is given to holders of the Buffered PLUS in accordance with the Indenture; (v) who could lawfully avoid (but has not so avoided) such withholding or deduction by complying, or requiring that any agent comply with, any statutory requirements necessary to establish qualification for an exemption from withholding or deduction or by making, or requiring that any agent make, a declaration of non-residence or other similar claim for exemption to any relevant tax authority; or

Buffered PLUS Based on the Performance of the EURO STOXX 50® Index due May 7, 2026

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

- (vi) who is subject to deduction or withholding on account of any tax, assessment, or other governmental charge that is imposed or withheld by reason of the application of Section 1471 through 1474 of the United States Internal Revenue Code of 1986, as amended (the "Code") (or any successor provisions), any regulation, pronouncement, or agreement thereunder, official interpretations thereof, or any law implementing an intergovernmental approach thereto, whether currently in effect or as published and amended from time to time.

For the purposes of clause (iv) above, if a security is presented for payment more than 30 days after the relevant date, we shall only be required to pay such Additional Amounts as shall have accrued as of such 30th day, and no further Additional Amounts shall accrue or become payable after such date.

For the avoidance of doubt, we will not have any obligation to pay any holders Additional Amounts on any tax which is payable otherwise than by deduction or withholding from payments made under or in respect of the Buffered PLUS.

We will also make such withholding or deduction and remit the full amount deducted or withheld to the relevant authority in accordance with applicable law. We will furnish to the Trustee, within 30 days after the date the payment of any Canadian taxes is due pursuant to applicable law, certified copies of Canadian tax receipts evidencing that such payment has been made or other evidence of such payment satisfactory to the Trustee. We will indemnify and hold harmless each holder of the Buffered PLUS (other than an Excluded Holder) and upon written request reimburse each such holder for the amount of (x) any Canadian taxes so levied or imposed and paid by such holder as a result of payments made under or with respect to the Buffered PLUS, and (y) any Canadian taxes levied or imposed and paid by such holder with respect to any reimbursement under (x) above, but excluding any such taxes on such holder's net income or capital.

For additional information, see the section entitled "Tax Consequences—Canadian Taxation" in the accompanying prospectus.

Employee Retirement Income Security Act:

If you are an insurance company or the fiduciary of a pension plan or an employee benefit plan (including a governmental plan, an IRA or a Keogh Plan) proposing to invest in the Buffered PLUS, please review the section of the accompanying prospectus "Benefit Plan Investor Considerations." If you are an insurance company or the fiduciary of a pension plan or an employee benefit plan, and propose to invest in the Buffered PLUS, you should consult your legal counsel.

Form of the Buffered PLUS:

Book-entry

Trustee:

The Bank of New York Mellon

Calculation agent:

RBCCM. The calculation agent will make all determinations regarding the Buffered PLUS. Absent manifest error, all determinations of the calculation agent will be final and binding on you and us, without any liability on the part of the calculation agent. You will not be entitled to any compensation from us for any loss suffered as a result of any of the above determinations or confirmations by the calculation agent.

Terms incorporated in the master note:

All of the terms in "Summary Terms" (except the item captioned "Commissions and issue price") and the terms in the section "Additional Terms of the Buffered PLUS" of this pricing supplement, and the section "Supplemental Discussion of U.S. Federal Income Tax Consequences".

Information About the Underlying Index

All disclosures contained in this document regarding the underlying index, including, without limitation, its make-up, method of calculation, and changes in its components, have been derived from publicly available sources. The information reflects the policies of, and is subject to change by, STOXX Limited, as the sponsor of the underlying index (the “index sponsor”). The index sponsor, which owns the copyright and all other rights to the underlying index, has no obligation to continue to publish, and may discontinue publication of, the underlying index. The consequences of the index sponsor discontinuing publication of the underlying index are discussed above in the section entitled “Additional Terms of the Buffered PLUS—Discontinuation of/adjustments to the underlying index.” Neither we nor RBCCM accepts any responsibility for the calculation, maintenance or publication of the underlying index or any successor index.

EURO STOXX 50® Index (“SX5E”)

The SX5E was created by STOXX Limited, a subsidiary of Deutsche Börse AG. Publication of the SX5E began in February 1998, based on an initial index level of 1,000 at December 31, 1991.

Composition and Maintenance

The SX5E is composed of 50 component stocks of market sector leaders from within the 20 EURO STOXX® Supersector indices, which represent the Eurozone portion of the STOXX Europe 600® Supersector indices.

The composition of the SX5E is reviewed annually, based on the closing stock data on the last trading day in August. The component stocks are announced on the first trading day in September. Changes to the component stocks are implemented on the third Friday in September and are effective the following trading day. Changes in the composition of the SX5E are made to ensure that the SX5E includes the 50 market sector leaders from within the SX5E.

The free float factors for each component stock used to calculate the SX5E, as described below, are reviewed, calculated, and implemented on a quarterly basis and are fixed until the next quarterly review.

The SX5E is also reviewed on an ongoing basis. Corporate actions (including initial public offerings, mergers and takeovers, spin-offs, delistings, and bankruptcy) that affect the SX5E composition are announced immediately, implemented two trading days later, and become effective on the next trading day after implementation.

Calculation of the SX5E

The SX5E is calculated with the “Laspeyres formula,” which measures the aggregate price changes in the component stocks against a fixed base quantity weight. The formula for calculating the SX5E value can be expressed as follows:

$$SX5E = \frac{\text{Free float market capitalization of the SX5E}}{\text{Divisor}}$$

The “free float market capitalization of the SX5E” is equal to the sum of the products of the closing price, market capitalization, the number of shares, the free float factor and weighing cap factor for each component stock as of the time the SX5E is being calculated.

The SX5E is also subject to a divisor, which is adjusted to maintain the continuity of the SX5E values across changes due to corporate actions, such as the deletion and addition of stocks, the substitution of stocks, stock dividends, and stock splits.

License Agreement

We have entered into a non-exclusive license agreement with STOXX providing for the license to us and certain of our affiliated or subsidiary companies, in exchange for a fee, of the right to use indices owned and published by STOXX (including the SX5E) in connection with certain securities, including the Buffered PLUS offered hereby.

The license agreement between us and STOXX requires that the following language be stated in this document:

STOXX has no relationship to us, other than the licensing of the SX5E and the related trademarks for use in connection with the Buffered PLUS.

STOXX does not:

- sponsor, endorse, sell, or promote the Buffered PLUS;
- recommend that any person invest in the Buffered PLUS offered hereby or any other securities;
- have any responsibility or liability for or make any decisions about the timing, amount or pricing of the Buffered PLUS;
- have any responsibility or liability for the administration, management, or marketing of the Buffered PLUS; or

Buffered PLUS Based on the Performance of the EURO STOXX 50[®] Index due May 7, 2026

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

- consider the needs of the Buffered PLUS or the holders of the Buffered PLUS in determining, composing, or calculating the SX5E, or have any obligation to do so.

STOXX will not have any liability in connection with the Buffered PLUS. Specifically:

- STOXX does not make any warranty, express or implied, and disclaims any and all warranty concerning:
- the results to be obtained by the Buffered PLUS, the holders of the Buffered PLUS or any other person in connection with the use of the SX5E and the data included in the SX5E;
- the accuracy or completeness of the SX5E and its data;
- the merchantability and the fitness for a particular purpose or use of the SX5E and its data;
- STOXX will have no liability for any errors, omissions, or interruptions in the SX5E or its data; and
- under no circumstances will STOXX be liable for any lost profits or indirect, punitive, special, or consequential damages or losses, even if STOXX knows that they might occur.

The licensing agreement between us and STOXX is solely for their benefit and our benefit, and not for the benefit of the holders of the Buffered PLUS or any other third parties.

Canadian Federal Income Tax Consequences

An investor should read carefully the description of material Canadian federal income tax considerations relevant to a Non-resident Holder owning debt securities under “Tax Consequences—Canadian Taxation” in the accompanying prospectus.

The Canadian tax disclosure in the prospectus also assumes that a Non-resident Holder (i) does not dispose of the Buffered PLUS to an entity that is a “specified entity” (as defined in proposed amendments released by the Department of Finance (Canada) on April 29, 2022) (the “Hybrid Mismatch Proposals”) with respect to such holder or in respect of which the holder is a “specified entity”; (ii) does not dispose of the Buffered PLUS under, or in connection with a “structured arrangement” (as defined in the Hybrid Mismatch Proposals); and (iii) is not an entity in respect of which Royal Bank of Canada is a “specified entity”.

Supplemental Discussion of U.S. Federal Income Tax Consequences

The following, together with the discussion of U.S. federal income taxation in the accompanying prospectus and prospectus supplement, is a general description of the material U.S. tax considerations relating to the Buffered PLUS. It does not purport to be a complete analysis of all tax considerations relating to the Buffered PLUS. Prospective purchasers of the Buffered PLUS should consult their tax advisors as to the consequences under the tax laws of the country of which they are resident for tax purposes and the tax laws of Canada and the U.S. of acquiring, holding and disposing of the Buffered PLUS and receiving payments under the Buffered PLUS. This summary is based upon the law as in effect on the date of this document and is subject to any change in law that may take effect after such date.

Supplemental U.S. Tax Considerations

The following section supplements the discussion of U.S. federal income taxation in the accompanying prospectus and prospectus supplement. It applies only to those initial holders who are not excluded from the discussion of U.S. federal income taxation in the accompanying prospectus. It does not apply to holders subject to special rules including holders subject to Section 451(b) of the Code.

NO STATUTORY, JUDICIAL OR ADMINISTRATIVE AUTHORITY DIRECTLY DISCUSSES HOW THE BUFFERED PLUS SHOULD BE TREATED FOR U.S. FEDERAL INCOME TAX PURPOSES. AS A RESULT, THE U.S. FEDERAL INCOME TAX CONSEQUENCES OF AN INVESTMENT IN THE BUFFERED PLUS ARE UNCERTAIN. BECAUSE OF THE UNCERTAINTY, YOU SHOULD CONSULT YOUR TAX ADVISOR IN DETERMINING THE U.S. FEDERAL INCOME TAX AND OTHER TAX CONSEQUENCES OF YOUR INVESTMENT IN THE BUFFERED PLUS, INCLUDING THE APPLICATION OF STATE, LOCAL OR OTHER TAX LAWS AND THE POSSIBLE EFFECTS OF CHANGES IN FEDERAL OR OTHER TAX LAWS.

We will not attempt to ascertain whether any of the entities whose stock is included in the underlying index would be treated as a “passive foreign investment company” within the meaning of Section 1297 of the Code, or a “U.S. real property holding corporation” within the meaning of Section 897 of the Code. If any of the entities whose stock is included in the underlying index were so treated, certain adverse U.S. federal income tax consequences could possibly apply to U.S. and non-U.S. holders, respectively. You should refer to any available information filed with the SEC and other authorities by the entities whose stock is included in the underlying index and consult your tax advisor regarding the possible consequences to you in this regard.

In the opinion of our special U.S. tax counsel, Ashurst LLP, it would generally be reasonable to treat a Buffered PLUS as a pre-paid cash-settled derivative contract in respect of the underlying index for U.S. federal income tax purposes, and the terms of the Buffered PLUS require a holder (in the absence of a change in law or an administrative or judicial ruling to the contrary) to treat the Buffered PLUS for all tax purposes in accordance with such characterization. If the Buffered PLUS are so treated, a U.S. holder should generally recognize capital gain or loss upon the sale, exchange or maturity of the Buffered PLUS in an amount equal to the difference between the amount a holder receives at such time and the holder's tax basis in the Buffered PLUS. In general, a U.S. holder's tax basis in the Buffered PLUS will be equal to the price the holder paid for the Buffered PLUS. Capital gain recognized by an individual U.S. holder is generally taxed at preferential rates where the property is held for more than one year and is generally taxed at ordinary income rates where the property is held for one year or less. The deductibility of capital losses is subject to limitations.

Alternative Treatments. Alternative tax treatments of the Buffered PLUS are also possible and the IRS might assert that a treatment other than that described above is more appropriate. For example, it is possible to treat the Buffered PLUS, and the IRS might assert that a Buffered PLUS should be treated, as a single debt instrument. Pursuant to such characterization, since the Buffered PLUS have a term that exceeds one year, such a debt instrument would be subject to the special tax rules governing contingent payment debt instruments. If the Buffered PLUS are so treated, a holder would generally be required to accrue interest income over the term of the Buffered PLUS based upon the yield at which we would issue a non-contingent fixed-rate debt instrument with terms and conditions similar to the Buffered PLUS. In addition, any gain a holder might recognize upon the sale, exchange or maturity of the Buffered PLUS would generally be ordinary income and any loss recognized by a holder at such time would generally be ordinary loss to the extent of interest that same holder included in income in the current or previous taxable years in respect of the Buffered PLUS, and thereafter, would be capital loss.

Because of the absence of authority regarding the appropriate tax characterization of the Buffered PLUS, it is also possible that the IRS could seek to characterize the Buffered PLUS in a manner that results in tax consequences that are different from those described above. For example, the IRS could possibly assert that any gain or loss that a holder may recognize upon the sale, exchange or maturity of the Buffered PLUS should be treated as ordinary gain or loss.

The IRS has released a notice that may affect the taxation of holders of the Buffered PLUS. According to the notice, the IRS and the U.S. Treasury Department are actively considering whether the holder of an instrument such as the Buffered PLUS should be required to accrue ordinary income on a current basis. It is not possible to determine what guidance will ultimately be issued, if any. It is possible, however, that under such guidance, holders of the Buffered PLUS will ultimately be required to accrue income currently and this could be applied on a

Buffered PLUS Based on the Performance of the EURO STOXX 50® Index due May 7, 2026

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

retroactive basis. The IRS and the U.S. Treasury Department are also considering other relevant issues, including whether additional gain or loss from such instruments should be treated as ordinary or capital and whether the constructive ownership rules of Section 1260 of the Code which very generally can operate to recharacterize certain long-term capital gains as ordinary income and impose an interest charge, might be applied to such instruments. Further, future legislation, including legislation based on bills previously introduced in Congress, may tax all derivative instruments on a mark-to-market basis, requiring holders of such derivative instruments to take into account annually gains and losses on such instruments as ordinary income. The adoption of such legislation or similar proposals may significantly impact the tax consequences from an investment in the Buffered PLUS, including the timing and character of income and gain on the Buffered PLUS. Holders are urged to consult their tax advisors concerning the significance, and the potential impact, of the above considerations. We intend to treat the Buffered PLUS for U.S. federal income tax purposes in accordance with the treatment described in this document unless and until such time as the U.S. Treasury Department and IRS determine that some other treatment is more appropriate.

Backup Withholding and Information Reporting. Payments made with respect to the Buffered PLUS and proceeds from the sale or exchange of the Buffered PLUS may be subject to a backup withholding tax unless, in general, the holder complies with certain procedures or is an exempt recipient. Any amounts so withheld generally will be refunded by the IRS or allowed as a credit against the holder's U.S. federal income tax liability, provided the holder makes a timely filing of an appropriate tax return or refund claim to the IRS.

Reports will be made to the IRS and to holders that are not exempted from the reporting requirements.

Non-U.S. Holders. The following discussion applies to non-U.S. holders of the Buffered PLUS. A non-U.S. holder is a beneficial owner of a Buffered PLUS that, for U.S. federal income tax purposes, is a non-resident alien individual, a foreign corporation, or a foreign estate or trust.

Except as described below, a non-U.S. holder will generally not be subject to U.S. federal income or withholding tax for amounts paid in respect of the Buffered PLUS, provided that (i) the holder complies with any applicable certification requirements, (ii) the payment is not effectively connected with the conduct by the holder of a U.S. trade or business, and (iii) if the holder is a non-resident alien individual, such holder is not present in the U.S. for 183 days or more during the taxable year of the sale, exchange or maturity of the Buffered PLUS. In the case of (ii) above, the holder generally would be subject to U.S. federal income tax with respect to any income or gain in the same manner as if the holder were a U.S. holder and, in the case of a holder that is a corporation, the holder may also be subject to a branch profits tax equal to 30% (or such lower rate provided by an applicable U.S. income tax treaty) of a portion of its earnings and profits for the taxable year that are effectively connected with its conduct of a U.S. trade or business, subject to certain adjustments. Payments made to a non-U.S. holder may be subject to information reporting and to backup withholding unless the holder complies with applicable certification and identification requirements as to its foreign status.

Under Section 871(m) of the Code, a "dividend equivalent" payment is treated as a dividend from sources within the United States. Such payments generally would be subject to a 30% U.S. withholding tax if paid to a non-U.S. holder. Under U.S. Treasury Department regulations, payments (including deemed payments) with respect to equity-linked instruments ("ELIs") that are "specified ELIs" may be treated as dividend equivalents if such specified ELIs reference, directly or indirectly, an interest in an "underlying security," which is generally any interest in an entity taxable as a corporation for U.S. federal income tax purposes if a payment with respect to such interest could give rise to a U.S. source dividend. However, the IRS has issued guidance that states that the U.S. Treasury Department and the IRS intend to amend the effective dates of the U.S. Treasury Department regulations to provide that withholding on dividend equivalent payments will not apply to specified ELIs that are not delta-one instruments and that are issued before January 1, 2025. Based on our determination that the Buffered PLUS are not delta-one instruments, non-U.S. holders should not be subject to withholding on dividend equivalent payments, if any, under the Buffered PLUS. However, it is possible that the Buffered PLUS could be treated as deemed reissued for U.S. federal income tax purposes upon the occurrence of certain events affecting the underlying index or the Buffered PLUS (for example, upon an underlying index rebalancing), and following such occurrence the Buffered PLUS could be treated as subject to withholding on dividend equivalent payments. Non-U.S. holders that enter, or have entered, into other transactions in respect of the underlying index or the Buffered PLUS should consult their tax advisors as to the application of the dividend equivalent withholding tax in the context of the Buffered PLUS and their other transactions. If any payments are treated as dividend equivalents subject to withholding, we (or the applicable withholding agent) would be entitled to withhold taxes without being required to pay any additional amounts with respect to amounts so withheld.

As discussed above, alternative characterizations of the Buffered PLUS for U.S. federal income tax purposes are possible. Should an alternative characterization, by reason of change or clarification of the law, by regulation or otherwise, cause payments as to the Buffered PLUS to become subject to withholding tax, we (or the applicable withholding agent) will withhold tax at the applicable statutory rate. The IRS has also indicated that it is considering whether income in respect of instruments such as the Buffered PLUS should be subject to withholding tax. We will not be required to pay any additional amounts in respect of such withholding. Prospective investors should consult their own tax advisors in this regard.

Foreign Account Tax Compliance Act. The Foreign Account Tax Compliance Act ("FATCA") imposes a 30% U.S. withholding tax on certain U.S.-source payments, including interest (and original issue discount), dividends, and other fixed or determinable annual or periodical gains, profits, and income ("Withholdable Payments"), if paid to a foreign financial institution (including amounts paid to a foreign financial institution on behalf of a holder), unless such institution enters into an agreement with the U.S. Treasury Department to collect and provide to the U.S. Treasury Department certain information regarding U.S. financial account holders, including certain account holders that are foreign entities with U.S. owners, with such institution or otherwise complies with FATCA. In addition, the Buffered PLUS may constitute a "financial account" for these purposes and thus, may be subject to information reporting requirements pursuant to FATCA. FATCA also generally imposes a withholding tax of 30% on Withholdable Payments made to a non-financial foreign entity, unless that entity provides the withholding agent with a certification that it does not have any substantial U.S. owners or a certification identifying the direct and indirect substantial U.S. owners of the entity. Under certain circumstances, a holder may be eligible for refunds or credits of such taxes.

Buffered PLUS Based on the Performance of the EURO STOXX 50® Index due May 7, 2026

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

The U.S. Treasury Department has proposed regulations that eliminate the requirement of FATCA withholding on payments of gross proceeds upon the sale or disposition of financial instruments. The U.S. Treasury Department has indicated that taxpayers may rely on these proposed regulations pending their finalization, and the discussion above assumes the proposed regulations will be finalized in their proposed form with retroactive effect. If we (or the applicable withholding agent) determine withholding is appropriate with respect to the Buffered PLUS, tax will be withheld at the applicable statutory rate, and we will not pay any additional amounts in respect of such withholding. Therefore, if such withholding applies, any payments on the Buffered PLUS will be significantly less than what you would have otherwise received. Depending on your circumstances, these amounts withheld may be creditable or refundable to you. Foreign financial institutions and non-financial foreign entities located in jurisdictions that have an intergovernmental agreement with the United States governing FATCA may be subject to different rules. Prospective investors are urged to consult with their own tax advisors regarding the possible implications of FATCA on their investment in the Buffered PLUS.

Use of Proceeds and Hedging

The net proceeds from the sale of the Buffered PLUS will be used as described under “Use of Proceeds” in the accompanying prospectus supplement and prospectus and to hedge market risks of Royal Bank of Canada associated with its obligation to make the payment at maturity on the Buffered PLUS. The initial public offering price of the Buffered PLUS includes the underwriting discount and commission and the estimated cost of hedging our obligations under the Buffered PLUS.

Supplemental Information Regarding Plan of Distribution; Conflicts of Interest

Pursuant to the terms of a distribution agreement, RBCCM, an affiliate of Royal Bank of Canada, will purchase the Buffered PLUS from Royal Bank of Canada for distribution to Morgan Stanley Wealth Management. RBCCM will act as agent for the Buffered PLUS and will receive a fee of up to \$30.00 per \$1,000 stated principal amount and will pay to Morgan Stanley Wealth Management a fixed sales commission of up to \$25.00 for each of the Buffered PLUS they sell. Of the amount per \$1,000 stated principal amount received by RBCCM, RBCCM will pay Morgan Stanley Wealth Management a structuring fee of \$5.00 for each Buffered PLUS. The costs included in the original issue price of the Buffered PLUS will include a fee paid by RBCCM to LFT Securities, LLC, an entity in which an affiliate of Morgan Stanley Wealth Management has an ownership interest, for providing certain electronic platform services with respect to this offering.

Morgan Stanley Wealth Management may reclaim selling concessions allowed to individual brokers within Morgan Stanley Wealth Management in connection with the offering if, within 30 days of the offering, Royal Bank of Canada repurchases the Buffered PLUS distributed by such brokers.

Delivery of the Buffered PLUS will be made against payment for the Buffered PLUS on November 3, 2023, which is the third business day following the pricing date (this settlement cycle being referred to as “T+3”). Under Rule 15c6-1 of the Exchange Act, trades in the secondary market generally are required to settle in two business days, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade the Buffered PLUS more than two business days prior to the original issue date will be required to specify alternative settlement arrangements to prevent a failed settlement.

In addition, RBCCM or another of its affiliates or agents may use this document in market-making transactions after the initial sale of the Buffered PLUS, but is under no obligation to do so and may discontinue any market-making activities at any time without notice.

For additional information as to the relationship between us and RBCCM, please see the section “Plan of Distribution—Conflicts of Interest” in the accompanying prospectus.

The value of the Buffered PLUS shown on your account statement may be based on RBCCM’s estimate of the value of the Buffered PLUS if RBCCM or another of our affiliates were to make a market in the Buffered PLUS (which it is not obligated to do). That estimate will be based on the price that RBCCM may pay for the Buffered PLUS in light of then prevailing market conditions, our creditworthiness and transaction costs. For an initial period of approximately fifteen months, the value of the Buffered PLUS that may be shown on your account statement is expected to be higher than RBCCM’s estimated value of the Buffered PLUS at that time. This is because the estimated value of the Buffered PLUS will not include the agent’s commission and our hedging costs and profits; however, the value of the Buffered PLUS shown on your account statement during that period is initially expected to be a higher amount, reflecting the addition of the agent’s commission and our estimated costs and profits from hedging the Buffered PLUS. This excess is expected to decrease over time until the end of this period, and we reserve the right to shorten this period. After this period, if RBCCM repurchases your Buffered PLUS, it expects to do so at prices that reflect its estimated value.

Each of MSWM and any other broker-dealer offering the Buffered PLUS have not offered, sold or otherwise made available and will not offer, sell or otherwise make available any of the Buffered PLUS to, any retail investor in the European Economic Area (“EEA”). For these purposes, the expression “offer” includes the communication in any form and by any means of sufficient information on the terms of the offer and the Buffered PLUS to be offered so as to enable an investor to decide to purchase or subscribe the Buffered PLUS, and a “retail investor” means a person who is one (or more) of: (a) a retail client, as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, “MiFID II”); or (b) a customer, within the meaning of Directive (EU) 2016/97, as amended, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (c) not a qualified investor as defined in Regulation (EU) (No 2017/1129) (the “Prospectus Regulation”). Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the “PRIIPs Regulation”) for offering or selling the Buffered PLUS or otherwise making them available to retail investors in the EEA has been prepared, and therefore, offering or selling the Buffered PLUS or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

Buffered PLUS Based on the Performance of the EURO STOXX 50® Index due May 7, 2026

Buffered Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

Each of MSWM and any other broker-dealer offering the Buffered PLUS have not offered, sold or otherwise made available and will not offer, sell or otherwise make available any of the Buffered PLUS to any retail investor in the United Kingdom. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018; or (ii) a customer within the meaning of the provisions of the Financial Services and Markets Act 2000 (the “FSMA”) and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018. Consequently no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (the “UK PRIIPs Regulation”) for offering or selling the Buffered PLUS or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Buffered PLUS or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

Structuring the Buffered PLUS

The Buffered PLUS are our debt securities, the return on which is linked to the performance of the underlying index. As is the case for all of our debt securities, including our structured notes, the economic terms of the Buffered PLUS reflect our actual or perceived creditworthiness at the time of pricing. In addition, because structured notes result in increased operational, funding and liability management costs to us, we typically borrow the funds under these securities at a rate that is more favorable to us than the rate that we might pay for a conventional fixed or floating rate debt security of comparable maturity. Using this relatively lower implied borrowing rate, rather than the secondary market rate, along with the fees and expenses associated with structured notes, reduced the initial estimated value of the Buffered PLUS at the time their terms were set. Unlike the estimated value that is set forth on the cover page of this pricing supplement, any value of the Buffered PLUS determined for purposes of a secondary market transaction may be based on a different funding rate, which may result in a lower value for the Buffered PLUS than if our initial internal funding rate were used.

In order to satisfy our payment obligations under the Buffered PLUS, we may choose to enter into certain hedging arrangements (which may include call options, put options or other derivatives) on the issue date with RBCCM or one of our other subsidiaries. The terms of these hedging arrangements take into account a number of factors, including our creditworthiness, interest rate movements, the volatility of the underlying index, and the tenor of the Buffered PLUS. The economic terms of the Buffered PLUS and their initial estimated value depend in part on the terms of these hedging arrangements.

The lower implied borrowing rate, the underwriting commission and the hedging-related costs relating to the Buffered PLUS reduced the economic terms of the Buffered PLUS to you and resulted in the initial estimated value for the Buffered PLUS on the pricing date being less than their public offering price. See “Risk Factors—The initial estimated value of the Buffered PLUS is less than the price to the public” above.

Validity of the Securities

In the opinion of Norton Rose Fulbright Canada LLP, the issue and sale of the Buffered PLUS has been duly authorized by all necessary corporate action of the Issuer in conformity with the Indenture, and when the Buffered PLUS have been duly executed, authenticated and issued in accordance with the Indenture and delivered against payment therefor, the Buffered PLUS will be validly issued and, to the extent validity of the Buffered PLUS is a matter governed by the laws of the Province of Ontario or Québec, or the laws of Canada applicable therein, will be valid obligations of the Issuer, subject to equitable remedies which may only be granted at the discretion of a court of competent authority, subject to applicable bankruptcy, to rights to indemnity and contribution under the Buffered PLUS or the Indenture which may be limited by applicable law, to insolvency and other laws of general application affecting creditors’ rights, to limitations under applicable limitations statutes, and to limitations as to the currency in which judgments in Canada may be rendered, as prescribed by the Currency Act (Canada). This opinion is given as of the date hereof and is limited to the laws of the Provinces of Ontario and Québec and the federal laws of Canada applicable thereto. In addition, this opinion is subject to customary assumptions about the Trustee’s authorization, execution and delivery of the Indenture and the genuineness of signatures and certain factual matters, all as stated in the letter of such counsel dated September 14, 2021, which has been filed as Exhibit 5.3 to the Issuer’s Form 6-K filed with the SEC dated September 14, 2021.

In the opinion of Ashurst LLP, when the Buffered PLUS have been duly completed in accordance with the Indenture and issued and sold as contemplated by the prospectus supplement and the prospectus, the Buffered PLUS will be valid, binding and enforceable obligations of the Issuer, entitled to the benefits of the Indenture, subject to applicable bankruptcy, insolvency, fraudulent transfer, reorganization, moratorium and similar laws of general applicability relating to or affecting creditors’ rights and subject to general principles of equity, public policy considerations and the discretion of the court before which any suit or proceeding may be brought. This opinion is given as of the date hereof and is limited to the laws of the State of New York. This opinion is subject to customary assumptions about the Trustee’s authorization, execution and delivery of the Indenture and the genuineness of signatures and to such counsel’s reliance on the Issuer and other sources as to certain factual matters, all as stated in the legal opinion dated September 14, 2021, which has been filed as Exhibit 5.4 to the Issuer’s Form 6-K dated September 14, 2021.
